

Shri Guru Gobind Singhji Institute of Engineering and Technology
Department of Information Technology
In-Semester Examination II
Academic Year: 2025-26 (Semester - I)

Class: SY B.Tech	Subject: Object Oriented Programming	Subject Code: PCC-IT202/203
Date: 14.10.2025	Time: 14:30 to 15:15	Max. Marks: 20

Note:

- Assume suitable data whenever necessary and state it clearly.
- Mobile phones and programmable calculators are strictly prohibited.
- Exchange/sharing of stationery, calculator, etc. is not allowed.
- Figures to the right indicate full marks.
- The symbols carry the usual meaning.
- For Q. No. 2.b answer without proper explanation will get 0 marks.

Q.N.	Question	Marks	CO	BT
Q.1 a	Explain Constructor, Parameterized constructor and Copy constructor with example.	5	CO1	BT2
b	Explain following tokens in brief in the context of C++ programming language: 1. Keyword 2. Identifier 3. Literal 4. Operator 5. Preprocessor Directive	5	CO2	BT2
Q.2 a	Evaluate the output of following program <pre>#include <iostream> using namespace std; class Student { private: string RNumber; public: Student(string c) { RNumber = c; } void showRNumber() { cout << RNumber << endl; } void setRNumber(string c) { RNumber = c; } }; void updateObject(Student* obj) { obj->setRNumber("2025BIT001"); obj->showRNumber(); } int main() { string regNumbers[5] {"2025BIT001", "2025BIT002", "2025BIT003", "2025BIT004", "2025BIT005"}; for (int i = 0; i < 5; i++)</pre>	5	CO3	BT5

		<pre> { Student obj(regNumbers[i]); updateObject(&obj); } return 0; } </pre>			
	b	Evaluate the output of following program on a little-endian system <pre> #include <iostream> using namespace std; int main() { int j = 4; for (int i = 0; i < 5; i++, j--) { long int x = 0x6162636465; static long int y = 0x6162636465; char* p = reinterpret_cast<char*>(&x); char* q = reinterpret_cast<char*>(&y); cout << *(p + j) << " " << *(q + i); cout << endl; } } </pre>	5	CO3	BT5

Bloom's Taxonomy (BT)

BT1 - Remember, BT2 - Understand, BT3 - Apply, BT4 - Analyse, BT5 - Evaluate, BT6 - Create

Course Outcomes:

	On successful completion of this course, students should be able to:
CO 1	Be able to understand the basics of OOP and Object-oriented approach
CO 2	Be able to test, document and prepare a professional looking software
CO 3	To be able to apply an object-oriented approach to programming and identify potential benefits of object-oriented programming over other approaches
CO 4	To read from and write to files using file streams, handle text and binary files, and perform operations such as reading, writing, and appending data.
CO5	To be able to design software to solve real world problems based on object-oriented principles

ISE II Examination

Class: SY B.Tech.

Course: Python Programming

Course Code: OE-IT201

Date: 17-10-2025

Time: 14:30 to 15:15

Max. Marks: 20

Instructions: 1. Make suitable assumptions wherever necessary. 2. All Questions are compulsory.

***"It always seems impossible until it's done."* – Nelson Mandela. All The BEST!**

OE-IT201.5 Able to understand and write python programming using files with error handling.

BT1- Remember, BT2- Understand, BT3- Apply, BT4- Analyze, BT5- Evaluate, BT6- Create

SGGS Institute of Engineering and Technology, Vishnupuri, Nanded

ISE-2 Examination (Semester-I) 2025-26

SY (CIVL/ CSE/ EXTC/ INST/ PROD/ CHEM/ TEXT/ ELEC/ MECH)

Python Programming

MDM-IS -IT201

Date: 16-10--2025

Time: 2:30PM to 3:15PM

Max. Marks: 20

Q.N.	Questions	Marks	CO OE-IT201. X	BTX
Q. 1	Using a marksheet example with Physics, Chemistry, and Mathematics as subjects for N students, explain the membership operators in Python. For Dr. Balaji Shetty's record, print the average marks and the corresponding grade. Also, illustrate enumeration with a suitable string example.	[10]	1-3	6
Q. 2	Student Grades - Total and Topper Ask the user to enter marks for 10000 students across 100 subjects Calculate each student's average marks. Find and print the name of the student with the highest average marks.	[10]	1-3	3 6
Q. 3	Define a Dictionary and list its commonly used methods. Write a Python program where a dictionary is passed to a function to print the grades of 3 students for 2 subjects (Phy and Chem). Case 1: Static Input (hardcoded dictionary) Case 2: Dynamic Input (dictionary created from user input)	[10]	1-3	2 6

Instructions: 1. Make suitable assumptions wherever necessary. 2. Solve any two questions.

Course Outcomes (CO)

MDM-IS-IT201.1 Utilize Python basics through the REPL environment, demonstrating proficiency in executing code snippets and exploring language features interactively.

MDM-IS-IT201.2 Implement Python Programs using core data structures like Lists, Dictionaries and use Regular Expressions.

MDM-IS-IT201.3 Able to understand and write python programming using conditions, loops, functions etc.

MDM-IS-IT201.4 Able to understand and write python programming using modules, packages, strings etc with error handling.

MDM-IS-IT201.5 Able to understand and write python programming using files with error handling.

Bloom's Taxonomy (BT)

BT1- Remember, BT2- Understand, BT3- Apply, BT4- Analyze, BT5- Evaluate, BT6- Create
