

Shri Guru Gobind Singhji Institute of Engg. & Technology, Vishnupuri, Nanded-431606.

Department of XXXXXXXXXX

Academic Year: 2025-26 (semester I)

In-Semester Examination / Evaluation I / II

Class: Final Year B.Tech.

Course Name: : Merchandising and
Supply Chain Management

Course Code: PEC-TT407

Date: 13.10.2025

Time: 14:30 to 15:15

Max. Marks: 20

Note:

- i. Assume suitable data whenever necessary and state it clearly.
- ii. Mobile phones and programmable calculators are strictly prohibited.
- iii. Exchange/Sharing of stationery, calculator etc. not allowed.
- iv. Figures to right indicate full marks.
- v. The symbols carry usual meaning.

Q.N.	Attempt any four questions.	Marks	CO	BT
Q.1	Compare general range development and buyer-specific range development with suitable examples?	5	CO3	BT4
Q.2	Describe the key technical and design specifications considered while selecting fabrics for export markets?	5	CO3	BT2
Q.3	Illustrate how fashion forecasting influences range development for global apparel brands and types of fashion forecasting?	5	CO3	BT3
Q.4	Explain the documents involved in the merchandising plan and the importance of a merchandising calendar?	5	CO2	BT2
Q.5	Describe the key technical and design specifications considered while selecting fabrics for export markets?	5	CO1	BT4
Q.6	Define merchandiser and explain the types of merchandiser?	5	CO2	BT1

=== ALL THE BEST ===

Bloom's Taxonomy (BT)

BT1 - Remember, BT2 - Understand, BT3 - Apply, BT4 - Analyze, BT5 - Evaluate, BT6 - Create

Course Outcomes:

	On successful completion of this course, students should be able to:
CO 1	Give details of the organization of the Garment business.
CO 2	Illustrate the Fashion marketing and merchandising process.
CO 3	Express retailing and Global Sourcing Strategies, Supply Chain and demand chain analysis.
CO 4	Decide between principle and supplementary documents.

Shri Guru Gobind Singhji Institute of Engg. & Technology, Vishnupuri, Nanded-431606.

Department of Textile Technology
In-Semester Examination / Evaluation II
Academic Year: 2025-26 (semester I)

Class: Final Year B.Tech.

Course: Production Management

Course Code: PCC-TT403

Date: 09/10/2025

Time: 14:30 PM to 15.15 PM

Max. Marks: 20

Note:

- Assume suitable data whenever necessary and state it clearly.
- Mobile phones and programmable calculators are strictly prohibited.
- Exchange/Sharing of stationery, calculator etc. not allowed.
- Figures to right indicate full marks.
- The symbols carry usual meaning.
- Attempt any 4 questions from below given questions.

Q.N.		Marks	CO	BT
Q.1	Explain what is meant by the term Just-in-time(JIT) ? Write down its GOALS.	5	CO1	BT1
Q.2	Explain Kaizen Philosophy for Process Improvement?	5	CO2	BT2
Q.3	What is Kanban Production Control System & Jidoka ?	5	CO1	BT2
Q.4	Explain Poka-Yoke & TPS ?	5	CO2	BT1
Q.5	Write a brief note on Pull Production System?	5	CO2	BT3
Q.6	For 10,000 Kgs/Day Ring yarn production of 20s Ne , calculate no of machines required in each section of Carded Spinning by assuming Practical Data of tpi,rpm,efficiency,waste, hank etc at your end of different machines ?	5	CO4	BT5

== ALL THE BEST ==

Bloom's Taxonomy (BT)

BT1 - Remember, BT2 - Understand, BT3 - Apply, BT4 - Analyze, BT5 - Evaluate, BT6 - Create

Course Outcomes:

	On successful completion of this course, students should be able to:
CO1	Perform functions of Production Engineer
CO2	Apply principles of production planning and control (PPC)
CO3	Install good layout and material handling system
CO4	Apply quality management tools and techniques
CO5	Solve sales forecasting and inventory management related problems
CO6	Prepare spinning and weaving production plans

Shri Guru Gobind Singhji Institute of Engg. & Technology, Vishnupuri, Nanded-431606.
Department of Textile Technology
In-Semester Examination / Evaluation II
Academic Year: 2025-26 (semester I)

Class: Final Year B.Tech.

Course: Knitting & Nonwoven

Course Code: PCC-TT402

Date: 10.10.2025

Time: 02:30 to 03:15 P.M.

Max. Marks: 20

Note: Solve any four questions. Write answers briefly.

Q.N.		Marks	CO	BT
Q.1	a) Define non-wovens.	2	CO1	BT1
	b) What are the applications of non-woven?	3	CO2	BT1
Q.2	Draw a flow chart and explain briefly the manufacturing process of non-woven from fibre to fabric.	5	CO3	BT2
Q.3	a) How does the intensity of opener measured in the blow room?	2	CO1	BT1
	b) Illustrate the sequence of working of weighing pan bale opener.	3	CO1	BT2
Q.4	a) Compare weighing feed and volumetric feed of cotton in the blow room.	2	CO1	BT2
	b) Define the intensity of carding. How it is measured?	3	CO1	BT1
Q.5	Draw and explain the web formation process by roller top card.	5	CO1	BT2

== ALL THE BEST ==

Bloom's Taxonomy (BT)

BT1 - Remember, BT2 - Understand, BT3 - Apply, BT4 - Analyze, BT5 - Evaluate, BT6 - Create

Course Outcomes:

	On successful completion of this course, students should be able to:
CO 1	Learning knowledge about fabric manufacturing process other than weaving, knitting & nonwoven.
CO 2	Apply knowledge nonwovens & knitted fabrics in end use application of knitting & nonwoven fabrics.
CO 3	Learning different types of knitting & nonwoven machines and their manufacturing.
CO 4	Explore a new idea for making knitted structures.
CO 5	Ability to compare the properties of woven, knitted & nonwoven fabrics.
CO 6	Analyze knitted fabrics from design point of view.

Note: i. Attempt any 2 questions from below questions. ii. Assume suitable data if necessary

Q.N.		Marks	CO	BT
Q.1	A civil infrastructure project in a flood-prone region requires the construction of a reinforced embankment and protective lining for water channels. The design team is considering the use of geotextiles for soil stabilization and coated fabrics for waterproofing and chemical resistance. The site experiences high UV exposure, variable pH runoff, and mechanical abrasion due to seasonal water flow. Figure			
a	Based on the above scenario, suggest appropriate types of geotextiles and geosynthetics for embankment reinforcement and channel lining applications. Justify your selection	6	CO2	BT3
b	Recommend the use of coir and wool fibre-based geotextiles instead of synthetic geotextiles for embankment applications.	4	CO3	BT2
Q.2	As per same scenario			
a	Suggest suitable coating techniques for geosynthetic materials used in soil stabilization, with the objective of achieving high levels of waterproofing and chemical resistance.	4	CO3	BT2
b	From the following list, choose the polymers that can be effectively utilized for coating applications in the given scenario. Justify your claim in term of critical factors mentioned in the scenario. a. NR b. SBR c. IIR	6	CO3	BT3
Q.3	a Differentiate between glass fibres and carbon fibres in terms of their composition, mechanical properties, and applications	5	CO4	BT2, BT4
b	What are aramid fibres? Compare Kevlar and Nomex in terms of structure, function and applications.	5	CO4	BT2, BT4
Q.4	a State the principle of filtration. Explain the dust collection theory in the context of textile-based filtration systems.	5	CO1	BT1, BT2
b	What are the common finishing treatments applied to filtration fabrics? How do these treatments improve the lifespan and efficiency of filtration media?	5	CO2	BT2, BT4

== ALL THE BEST ==

Bloom's Taxonomy (BT): BT1 - Remember, BT2 - Understand, BT3 - Apply, BT4 - Analyze, BT5 - Evaluate, BT6 - Create

Course Outcomes:

CO1: Students will be able to learn and remember the basics of technical textiles, manufacturing methods and application areas of technical textiles

CO2: Students will understand the different finishing and coating techniques used to manufacture technical textiles.

CO3: Students will be able to apply the knowledge of technical yarns and technical sewing threads used in different applications of technical textiles in the industry

CO4: This course will enable the students to analyze the different fibres, fabrics and manufacturing methods used for the development of technical textiles.

CO5: Students will be able to evaluate the different test methods used for the assessment of technical textiles

CO6: Students will be competent enough to design different technical textile products such as air-bag, belts, tyre cords, automotive textiles, filter fabric, geotextiles etc.
