

Shri Guru Gobind Singhji Institute of Engg. & Technology, Vishnupuri, Nanded-431606.
Department of Textile Technology
In-Semester Examination / Evaluation II
Academic Year: 2025-26 (semester I)

Class: SY B. Tech.

Course: Textile Wet Processing-I

Course Code: PCC-TT203

Date: 10.10.2025

Time: 14:30 to 15:15

Max. Marks: 20

Note:

- i. Assume suitable data whenever necessary and state it clearly.
- ii. Mobile phones and programmable calculators are strictly prohibited.
- iii. Exchange/Sharing of stationery, calculator etc. not allowed.
- iv. Figures to right indicate full marks.
- v. The symbols carry usual meaning.

Q.N.		Marks	CO	BT
Q.1	State the objectives of scouring for wool fibres. Discuss batch and continuous methods in brief.	4	CO3	BT3
Q.2	Compare and contrast the degumming process of mulberry silk and wild silk. Explain the role of sericin removal in enhancing dye uptake and softness.	6	CO3	BT2
Q.3	Discuss the mercerisation process in detail and its impact on physical and chemical changes in cotton, and performance metrics used to assess mercerisation quality.	6	CO4	BT3
Q.4	Discuss suitability of Jigger and Winch dyeing machines for batch dyeing of cotton and wool fabrics. Recommend machine selection for a small-scale unit focusing on reactive dyeing of cotton and acid dyeing of wool.	6	CO4	BT3

=== ALL THE BEST ===

Bloom's Taxonomy (BT)

BT1 - Remember, BT2 - Understand, BT3 - Apply, BT4 - Analyze, BT5 - Evaluate, BT6 - Create

Course Outcomes:

	On successful completion of this course, students should be able to:
CO 1	In textile dye house students will understand dyeing preparatory processes & functioning of different machines.
CO 2	Students will understand & appreciate different dyeing conditions & machine operations in dye house.
CO 3	Students will understand quality evaluation aspects of dyeing process & products.
CO 4	Students will understand color measurement procedures & standards.

Department of Textile Technology
In-Semester Examination / Evaluation II
Academic Year: 2025-26 (semester I)

Class: SY B.Tech.

Course: Spun Yarn Technology-I Course Code: PCC-TT201

Date: 13.10.2025

Time: 14:30 to 15:15

Max. Marks: 20

Note: All questions carry equal marks. Attempt any four questions.

Q.N.		Marks	CO	BT
Q.1	Calculate the production (kg/8hr) of a scutcher producing a lap of 0.00132 hank. The delivery speed is 12m/min and efficiency is 85%.	5	CO4	BT5
Q.2	Explain the factors affecting the waste level in blow room.	5	CO3	BT2
Q.3	Four machines M1, M2, M3 & M4 of a blow room line have cleaning efficiency of 22%, 18%, 16% and 12% respectively. If the trash% in the mixing is 11.2% then calculate the overall cleaning efficiency of blow room.	5	CO4	BT5
Q.4	Explain the carding and stripping actions in carding machine	5	CO2	BT2
Q.5	a) What are the functions of licker-in? b) Explain the factors affecting the opening intensity in the feed zone.	2 3	CO1 CO3	BT1 BT2

=== ALL THE BEST ===

Bloom's Taxonomy (BT)

BT1 - Remember, BT2 - Understand, BT3 - Apply, BT4 - Analyze, BT5 - Evaluate, BT6 - Create

Course Outcomes:

	On successful completion of this course, students should be able to:
CO 1	Understand the fundamentals of ginning, blowroom, carding and drawframe.
CO 2	Demonstrate the different components and mechanism of machines used in ginning, blowroom, carding and drawframe.
CO 3	Apply the knowledge for efficient working of ginning, blowroom, carding and drawframe.
CO 4	Analyse the efficiency, waste percentage, draft and production calculation of spinning processes.
CO 5	Understand and investigate the new advancement from ginning to drawframe.
